

The Student Council and Class Reps have had a busy time this week making sure that their fundraising efforts from the Christmas Fair reached the children that they are 'Making a Difference' to. Our reps handed over the many boxes of pre-loved clothes that so many of our primary children donated, which were gratefully accepted by the Egyptian Clothing Bank. We were also able to hand over a massive total of 67,774LE to Abo El Reesh Hospital. What an incredible achievement from all our children! It was an exceptional effort which was really enjoyed by all children, staff and parents here in BISM Primary. The Student Voice are already very enthusiastically planning more fundraising events for later this term so they can continue to 'Make A Difference' to others. Well done Primary!!

GOING ON A BEAR HUNT

The FS1 children have been learning the story 'Going on a Bear Hunt' by Michael Rosen. The FS1 children can feel the various narrative textures while walking through them thanks to our sensory walk! They had the chance to listen to the text while moving around the various surroundings, which improved their listening skills, prolonged their attention spans and patience. To participate, the children were able to recognise the patterns in the text and join in with the repeated refrains as well.

SECONDARY STUDENT COUNCIL SPORTS DAY

BISM student council organized a sports assembly for upper school students. The assembly was designed based on point-based games. All students participated in the different rounds to challenge their abilities and teamwork skills in order to win the great trophy. It was a great chance to get out of classrooms and enjoy the warm sun while strengthening the friendship bond between the classes.

BUSINESS STUDIES CLASS TRIP TO DAHAB-EGYPT

Our students taking up Business Studies went to Dahab to interview small to medium business owners and managers to collect primary data to reflect on syllabus taught in class. These visits to businesses provided an opportunity for students to see first-hand how different operations are managed in the travel and tourism industry.

They help students learn directly from the workplace and provided excellent opportunities for work related assignments. They prepared questioned for a small enterprise and for the operation manager in a well reputable hotel in Dahab. They asked about pricing strategies, external influences, and the welfare of the workforce. They were very well received by students as the understanding of business operations allow the students to see the application of theory in practice and enhance classroom learning and discussion by providing a live case study.

Students also explored different activities and discussed how can they help promote such touristic places to better help the contribution of the travel & tourism industry in increasing the GDP of the country.
