

BISM CAREER WEEK

BISM career week has been full of opportunities and inspiration. The week started on Thursday, as students attended a very informative session about the field of plastic surgery by Dr. Hadeel Ashraf. She also answered many questions about the life of medical students and the chances of working abroad in the field of medicine.

Captain Kareem Ezzo then had a very interactive talk with Year 10, 11 and 12 students about how fun and rewarding his job as a pilot is, it was a very inspiring session to all attendees.

The week then continued as students started their visits to AUC and GIU campuses, where students learned about different career paths and what the possibilities are for their future.

On Tuesday, we hosted TBS, our sister school students. Mr. Loai Zuhair gave an amazing session about the defining moments in his life. The session motto was "work hard, play harder" which was enlightening to many students. Followed by this, we hosted Mr. Ramy Radwan, who talked about how little milestones make up your life and openly answered many of our students' questions about media and jobs in the media career!

On Wednesday, university visits resumed with Y10,11, and 12 going to Coventry and Hertfordshire campuses in the new capital, where students had a tour around both campuses and attended presentations about different career paths provided by both universities.

Finally, on Thursday the week ended when we hosted professors from the BUE in the field of mechatronics and cybersecurity. The Vice dean of computer science, Dr. Ann herself, answered the students' questions about those very promising career opportunities, and positively encouraged our very curious students to keep exploring the new options available for their careers

Earthquake victims donation initiative!

We are so grateful for the kindness, compassion and generosity of our community who supported us with their immediate response in sending blankets, baby food, clothes, torches and canned food that we sent to earthquake victims of Syria.

Together we were able to send 1 bus and 2 cars full of stuff to the Egyptian Red Crescent which will send an aeroplane full of donations to Syria on Monday.

Thanks to the volunteer staff who spent their break time collecting everything together.
