

# IGCSE Internship

BISM Internship is an opportunity for a student to spend time with one or more employees at a business. The objective is to provide an opportunity to observe and gain hands-on experience in how business and industry work. By being at the work site, students will get a firsthand perspective of the skills and tasks required on the job. The internship program aims to increase the student's knowledge of workplace skills and receive on-the-job experience. The internship experience is selected based on the student's chosen career cluster/pathway. In addition, it enables the teachers to communicate to students what skills and knowledge are necessary to enter specific careers. Internships also help teachers keep their curricula up-to-date!

As a career-skills-focused school, we leverage the exclusive BISM young professional programme to offer all our students from Y10, Y11 and Y12 access to extraordinary professional and personal development opportunities through working on real projects impacting real business in QNB, TMG, GEMS Education, Regina, Kempinski, and Aman.

# Mental Health Programme in BISM

I'm Lamyia El Mahdy, mental health counsellor and life coach at BISM! We believe addressing mental health needs in school is critically important. We provide strategies, resources, and training in psychological and mental health issues, not only for students but also for parents and staff members including coping with tragedy, crisis intervention, prevention, and helping students know themselves better (self-discovery) through individual and group coaching sessions.

Self-knowledge leads to a better future. Throughout the self-discovery sessions, students focus on figuring out who they are by learning about their values, character strengths, unique qualities and skills. Knowing oneself better is central to their career journey, decision making and the life one wants to lead. All students from years 2 until 6 have the opportunity to join mental health or life coaching sessions on a regular basis as part of their personalized learning journey at BISM. Students can ask for one 2 one sessions either by self-referral, parent referral or teacher referral.

Discussing bullying as a result of different familial setup

The worries sheet to relieve anxiety.

Meditation session for year 5 girls.

Group coaching session for year 4.

Writing a stress then peeling it off to relieve anxiety.

One 2 one coaching session for primary student.

What we have in common, group coaching session

Cards question game focusing on the sense of belonging.

# Aliens have landed at BISM

Year 5 lessons were interrupted by some disturbing news!

Ms Nicky, Head of Primary, informed students that a mysterious incident happened in the school car park. She requested that students in year 5 go and investigate. Year 5 students went downstairs accompanied by their teachers and found some strange traces of slime, mysterious black powder and suspicious hands or footprints. They acted as detectives and started looking for clues to explain what happened. Students came up with a lot of theories, but the most popular theory was that a UFO landed at school and there is an alien on the loose somewhere on the school grounds!!!

Students then worked on writing a recount of what they saw in the form of a newspaper article to be displayed to everyone.

Next time you are walking around the school, make sure to have a lookout for an alien on the loose roaming the school grounds!
