

HAVE A VOICE

One of our character building program objectives is to focus on developing communication and public speaking skills, therefore last week, we hosted Dr. Anoud, toastmaster's representative, to introduce the idea of Toastmasters and educate students about public speaking.

Public speaking is an essential skill that can benefit students in various aspects of their lives. It helps build confidence, improves communication abilities, enhances critical thinking, and allows individuals to express their ideas effectively.

Toastmasters typically follows a structured approach to help individuals improve their public speaking abilities. Members participate in meetings where they deliver prepared speeches, impromptu talks, and receive constructive feedback from fellow members. This process allows individuals to learn from their peers, gain confidence through practice, and refine their speaking techniques over time.

Celebrating BISM Eagles

BISM school field was buzzing with joy and excitement celebrating 43 students and 6 staff who represented BISM at our first BSME games abroad. A huge thank you to all BISM eagles for making us extremely proud with their attitude, behaviour, resilience and skill during all games against 12 schools from different countries in the Middle East. This celebration was a great way to promote team spirit, cooperation, and physical activity among students.

Doha College hosted the BSME under 13 and 15 football tournament on Friday and Saturday 25th & 26th of November, it is worth noting that they praised all BISM players and staff for their outstanding sportsmanship and team spirit!

Congratulations to all of our players who participated in the Qatar BSME under 13 and 15 football tournament! It was a pleasure to watch our BISM eagles soar high in their first international intense competition. Whether they won first place, scored a few goals, or just had fun, we appreciate your effort to show your best. Hats off to the under-13 girls' football team for winning the 2nd place overall.

Primary Eduactional Trips

It has been great to see our children going out and about on trips this week. Year 2 class embarked on an exciting day of fun, adventure and curiosity at the Family Park. The day was filled with wonder as students observed captivating zoo animals, explored the fascinating exhibits in the museum, and enjoyed delightful moments of play in the playground. They also screamed their delight whilst being swung and twisted around on 'The Whale' ride and enjoyed the train journey around the park. This immersive experience not only fostered their curiosity about the animal kingdom but also provided a holistic blend of education and recreation.

Year 5 students have been thoroughly engaged in their studies on the Victorian era this term. To complement their classroom learning, a visit to the Abdeen Museum Palace was organised to provide them with a real-life glimpse into what Egypt was like during Queen Victoria's rule in the United Kingdom.

The day began with a fascinating guided tour, where they learned about the historical significance of the palace.

The highlight of the visit was the scavenger hunt, where students enthusiastically scanned the museum for different artefacts. This hands-on activity allowed them to apply the knowledge they had gained in class and discover firsthand the unique cultural and historical treasures in the museum.
