

“Make a positive Change” Ramadan Donations Packing

BISM primary students, guided by their teachers and staff, gathered in the school's assembly hall to kick off the packing event. Excitement and enthusiasm filled the air as the children eagerly geared up to assemble the Ramadan bags. The tables were lined with an array of essential items and treats, from dates and nuts to handwritten cards of appreciation.

Students carefully packed each bag with love and care, ensuring that every item was thoughtfully chosen to bring comfort and joy to the recipients. As they worked together, laughter and chatter echoed through the hall, creating a sense of unity and purpose among the young volunteers. Through their efforts, the students not only cultivated empathy, compassion, helpfulness and generosity but also made a positive change in their community, leaving a lasting impact that resonated with kindness and unity. May this act of generosity inspire us all to continue spreading compassion throughout the year.

“Inspire Others”

GEMUN 24

GEMS Egypt Model United Nations took place over the weekend (March 7- March 9). We can't be prouder of BISM students who pulled off this amazing conference discussing “disregarded issues”.

Special thanks to Nadeen Ashraf who honoured us with her presence as a keynote speaker, addressing women's issues a day before International Women's Day. Grateful for Nawaya Egypt's support through their warm company and delicious food. This conference would not have taken place without the dedication and commitment of the students who hosted the conference.

Congratulations to all of the delegates, especially those recognized by their chairs, who came from all GEMS Education schools in Egypt, as Best Delegates and those who received Honorable Mentions from the following schools:

Hayah International Academy
GEMS British School Al Rehab
Madinaty Integrated Language School
GEMS International School Cairo
Heritage Canadian International School
Gateway International Montessori School

“Seek Challenges”

STEM Fair

We are thrilled to share the highlights of yet another remarkable event at BISM – the annual STEM Fair for primary students. This year, the fair showcased the impressive talents and innovative spirit of Year 4 and 5 students, who wowed us all with their ingenuity and creativity.

The event was a celebration of young minds delving into the realms of science, technology, engineering, and mathematics, and applying their knowledge to real-world challenges. From ingenious projects like the line follower, RFID lifts, to the smart traffic light system, each exhibit was a testament to the students' dedication and passion for STEM. The fair provided a platform for our budding innovators to not only showcase their projects but also to share their journey of exploration and discovery. Through hands-on demonstrations and presentations, students exhibited an understanding of STEM concepts and their applications. The atmosphere at the fair was buzzing with excitement and curiosity as students eagerly explained their projects to peers, parents, and teachers.

“Inspire Others”

EEP/BISM Innovation Fair For Secondary

The Innovation Fair held at BISM for students in grades 6 to 10 from 5 different EEP schools, was an exhilarating competition that combined problem-solving, creativity, and robotics.

Students showcased their skills and knowledge in a challenging and dynamic environment. They eagerly participated in solving thought-provoking questions, putting their critical thinking and problem-solving abilities to the test. The robotics competition added an exciting dimension to the event, where teams of students designed, built, and programmed robots to navigate complex challenges. The atmosphere was filled with intense competition, collaboration, and innovation as teams showcased their robots' capabilities and strategies. It was a celebration of unity, teamwork, embracing challenges, and inspiring others to demonstrate their technical prowess and resilience. Congratulations to our remarkable BISM Seniors, BISM Juniors and BISM Mavericks Juniors for securing both first and second place in the competition.
